

Provided by Rackspace
Bluehost does not offer CNAME autodiscover. What to do? Is it because there is already a Bluehost CNAME Autodiscover?

Type	Hostname	Destination	Priority	TTL
MX	@ or left blank	mx1.emailsrvr.com	10	3600 seconds or lowest allowed
MX	@ or left blank	mx2.emailsrvr.com	20	3600 seconds or lowest allowed
TXT	@ or left blank	v=spf1 include:emailsrvr.com ~all	NA	3600 seconds or lowest allowed
CNAME	autodiscover	autodiscover.emailsrvr.com	NA	3600 seconds or lowest allowed

What is currently there
